Creative Web Design

Web Design

"We are a dedicated team of professionals known for our innovative approach, motivation, and problem-solving skills. Our mission is to craft websites that accurately reflect your onlineidentity, incorporating the latest trends and market insights. We specialize in creating modern, dynamic web designs tailored to your unique brand and business objectives."

We offer a diverse range of creative web design solutions tailored to meet each client's specific needs and industry standards. Our expertise lies in crafting designs that align with current trends while ensuring they are customized to suit the unique requirements of our clients and their respective industries. Like Corporate Websites, E-commerce Platforms, Mobile-Friendly Websites, Website Revamps and Online Catalogs.

"Why create a website with us"

- We realize the importance of a well-designed website for business success and strive to provide the finest solution for your needs.

- Our attitude and work quality are professional, from the procedure to the end result.

- We care enough to recommend what will work best for your needs.

- Our industry experience ensures consistent availability for website demands, upgrades, maintenance, and redesigns.

- We assist our clients' web growth and offer tailored solutions to meet their needs.

We provide prominent web design solutions, which include

- Business Web-Design
- Responsive Web-Design
- CMS Web-Design

Business web-design

We provide a range of web design solutions tailored to each customer's sector and requirements. A dedicated website is essential for each business, regardless of size. It should target a specific audience. Creating an attractive website that meets the business objective requires understanding the target audience.

JK Global IT Solutions understands this. We use our skills and experience to recommend the best web design for your business.

Business web design is excellent for individuals seeking a portfolio website or large corporations needing a corporate gateway. You can choose between a simple static website and an elaborate website with a content management system.

Responsive web-design

JK Global IT Solutions helps businesses create mobile-friendly websites that fulfill all criteria. We provide responsive design solutions to enhance your website's functionality on various internet devices.

Our specialists are well-versed in creating lightweight, responsive web design solutions tailored to specific needs. You can opt for a design layout specifically for mobile devices or a responsive design adaptable to all devices.

As responsive web design is regarded as a best practice online, we include it by default in all our new web design solutions. If you already have a website that lacks a responsive layout, we can assist in converting it to a responsive design.

Advantages of having a responsive website

- Provides a seamless and consistent experience across all devices.
- Enhances usability, making it easier for visitors to navigate and find information.
- A single URL for all devices simplifies your SEO strategy and avoids duplicate content issues.
- Optimized design elements for different devices ensure quicker load times.

CMS Web-design solution

(Content Management System)

Since the inception of the internet, websites have remained the most powerful marketing tool. The key element that attracts your target audience and facilitates business operations on these websites is the content. Content truly reigns supreme.

A content management system is essential for keeping your website's material relevant and up to date. JK Global IT Solutions focuses on using WordPress's backend system to create CMS websites that are up-to-date in terms of technology and security.

ur CMS systems are simple and easy to use, giving business owners the advantage of keeping their website up to date. With extensive blogging tools, you may publish regular pieces that will benefit your target audience and create more revenue.

Content Management System solutions can be utilized on websites.

- Numerous pages are necessary
- Integration of multiple plugins is required
- Improved SEO management of the website is essential

Web Maintenance

Having a website or web application online is only the first step toward obtaining results for your business on the internet. The actual adventure and responsibilities begin at that time. True success depends on how well your website or online application is maintained. JK Global IT Solutions provides web maintenance as a core service, taking on the task of maintaining your website up to the appropriate standards with painstaking attention.

We provide web maintenance options that allow you to focus on your business while we manage your website professionally.
We extend our assistance to be there when your website need updates, corrections, redesign, etc.

Moreover we take care of the following

- Manage your website and hosting by updating the core, ensuring uptime, and maintaining security.
- Offer prompt assistance for restoration in case of any problems.
- Provide support for minor updates and fixes.
- Keep your on-page content current.
- Provide timely updates and reminders for your domain and hosting.
- Offer support for your hosting server, mail servers, and analytics.
- Deliver comprehensive proactive support.

Web Applications

The internet has transformed company operations, making information technology vital in business and daily life. IT is now crucial for corporate growth. The internet is as essential as any other resource today. Businesses are developing web apps for mutual benefit, shifting from traditional methods to cloud-based operations, automation, and data integration.

At JK Global IT Solutions, we help businesses achieve their online goals by identifying objectives, creating foundational requirements, and delivering tailored online solutions. Our team of experts, including analysts, designers, developers, UX specialists, quality controllers, and project managers, is dedicated to delivering results that benefit your organization, ensuring a positive ROI and sustained profitability.

The project processes implemented by our teams are tailored to each client and their unique requirements. Our adaptability and comprehension enable us to achieve results for you effectively. Our primary proficiency lies in delivering PHP and MySQL-based applications. With a wealth of experience in executing numerous projects for clients worldwide, we can confidently assure you of delivering the perfect solution for your needs.

We provide prominent web application solutions, which include

- Custom web applications
- e-Commerce web solutions
- Matrimony web solutions

Custom web applications

Customized web apps are now in high demand. Custom web apps are necessary for providing more functionality or sophistication to your team or consumers after establishing a website. JK Global IT Solutions can provide extra capabilities based on your specific requirements.

JK Global IT Solutions has provided high-quality, cost-effective IT solutions to organizations of all sizes for over a decade. We can handle both small and large scale bespoke web applications. Our services include third-party integrations and API implementations.

Our team has extensive expertise dealing with APIs such as eBay, Amazon, AWS, Facebook, MailChimp, SMS gateways, and payment gateways.

E-Commerce web solutions

Our e-commerce and shopping cart solutions are safe and user-friendly, making them suitable for small and medium enterprises. JK Global IT Solutions offers solutions tailored to your product type, target audience, business process, and operability. We have implemented manageable e-Commerce solutions for both B2C and B2B.

We offer customized eCommerce solutions for Wordpress and Opencart, with optional plugins to meet your specific needs.

Matrimony Web Solutions

Marriages are formed in paradise, and marriage websites are built using the JK Global IT Solutions. We are well-known for the numerous successful matrimony websites that we have supplied to our clientele. We have developed successful matrimonial websites with thousands of profiles. Our expertise in understanding marriage requirements and user experience distinguishes us in providing exceptional solutions.

Bulk SMS

Bulk SMS is a service provided by JK Global IT Solutions that allows businesses to send large volumes of text messages to a targeted audience. This service is invaluable for efficient communication with customers or clients, enabling businesses to deliver marketing messages, notifications, or updates in a cost-effective and timely manner.

Most of the users for Bulk SMS on JK Global IT Solutions:

- Businesses may use bulk SMS to provide promotional offers, updates, and notifications to customers.
- Non-profit Organizations: Communicate with supporters, volunteers, and funders about fundraising events and updates.
- Educational institutions should notify students and parents about significant news, events, or crises.
- Government agencies distribute information to individuals about public services, crises, and announcements.
- Healthcare providers can send appointment reminders, health suggestions, or alarms to patients.

Mass Messaging

Mass messaging on JK Global IT Solutions is the service of sending large-scale messages to a specific audience using our platform. This tool allows organizations to easily send messages, notifications, or updates to a large number of people at once, promoting successful communication and engagement.

Delivery Reports

JK Global IT Solutions Bulk SMS Delivery Reports provide real-time updates on message delivery status, including successes, pending messages, and failures. Users can monitor campaign performance and address delivery issues promptly for efficient communication with their audience.

Two-Way Messaging

JK Global IT Solutions Bulk SMS enables two-way communication, allowing recipients to respond to messages. This fosters interaction, enabling businesses to engage with their audience, gather insights, and address queries promptly, enhancing satisfaction and engagement.

API Integration

API Integration with Bulk SMS on JK Global IT Solutions streamlines the incorporation of messaging functionality into existing systems or applications. This feature enables seamless communication between the user's platform and JK Global IT Solutions Bulk SMS service, allowing for automated and efficient message sending.

Mobile applications

JK Global IT Solutions is available to help you with your mobile application needs. Our mobile app developers can meet your expectations, whether you need a simple fun app or a corporate application.

We excel in delivering high-quality and functional solutions for both Android and iOS platforms. Our consultation services ensure the development of apps tailored to your target market, leveraging the latest available technology.

Billing Software

JK Global IT Solutions offers billing software designed to streamline invoicing and billing for businesses. It efficiently manages invoices, payments, and financial transactions with features like automated billing, customizable templates, inventory management, and reporting capabilities, optimizing billing operations for enhanced financial efficiency.

Invoice Generation

JK Global IT Solutions encompasses the meticulous creation of comprehensive documents delineating the goods or services rendered, their associated costs, and the agreed-upon payment terms. These documents, commonly referred to as invoices, are initiated by a seller and directed to a buyer, serving as an official request for payment while concurrently documenting the specifics of the transaction for both parties.

Recurring billing

Recurring billing by JK Global IT Solutions automates charging customers for subscribed services at set intervals, streamlining payment management and ensuring seamless service delivery. By eliminating manual invoicing, businesses can focus on core operations while maintaining consistent revenue. This fosters lasting customer relationships through convenience and reliability, building long-term loyalty.

Tax Calculation

Tax computation through JK Global IT Solutions involves automated systems accurately assessing taxes for transactions, ensuring compliance and streamlining financial administration for enterprises. This feature saves time, reduces errors, and maintains accurate financial records.

Expense Tracking

JK Global IT Solutions offers expense tracking, which comprises systematic recording and monitoring of expenses. This tool allows firms to effectively track and manage their spending, resulting in precise financial management and budget control. JK Global IT Solutions automates expenditure tracking operations, allowing organizations to save time, reduce mistakes, and keep full financial records.

Financial Reporting

Financial reporting at JK Global It Solutions is the systematic generation and analysis of financial data. This tool allows firms to generate detailed reports that provide insight into their financial performance and health. JK Global IT Solutions automates financial reporting procedures, allowing organizations to save time, improve accuracy, and make educated decisions based on trustworthy data.

Integration with Accounting Software

Integration with accounting software through JK Global IT Solutions enables smooth data interchange among diverse systems. This functionality guarantees harmonious interaction between JK Global IT Solutions and different accounting platforms, simplifying financial operations and boosting productivity. By automating integration processes, businesses can eradicate manual data input, minimize mistakes, and uphold precise financial records throughout their entire network.

Graphic Design

JK Global IT Solution offers a wide range of graphic design services, including brand identity creation, marketing materials, digital and web design, print design, custom illustrations, infographics, and multimedia animations. we focus on innovation, quality, and client collaboration to deliver visually appealing and effective designs.

Brand Identity Design

- Logo design is the process of creating one-of-a-kind logos that express the identity of a business.
- Brand Guidelines Create thorough recommendations to maintain consistent branding across all materials.
- Business stationery entails creating business cards, letterheads, and envelopes.

Marketing and Advertising

- Brochures & Flyers Developing appealing advertising materials for products and services.
- Posters and Banners Create large-format graphics for events, trade exhibitions, and commercials.
- Social Media Graphics Created graphics that are optimized for various social media networks.
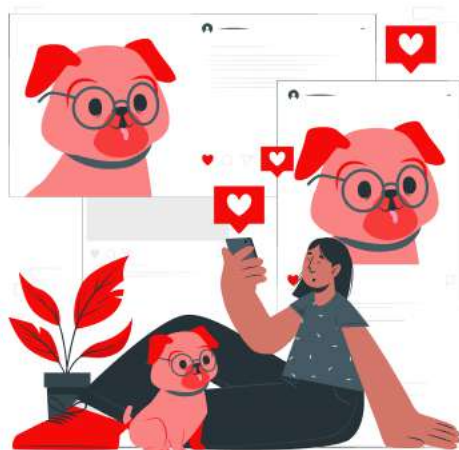

www.jkglobalitsolutions.com

Illustration and Infographics

- Custom Illustrations Creating customized artwork for a variety of tasks.
- Infographics are helpful and visually attractive images used to communicate difficult data or concepts.

Multimedia and Animation

- Presentations Multimedia presentations may convey information in a more fascinating and engaging manner than standard text-based presentations.
- Marketing materials Multimedia may be utilized to generate more successful marketing materials, such as brochures and movies, by catching attention and communicating messages.
- Animation may be used to bring motion to static imagery like logos and pictures. This might make the visuals more visually appealing and memorable.
